Round Pipes

You can count on us.

SPAETEROberhausen
A company of the SPAETER Group

Hot formed welded Round Pipes

Hot formed, welded Round Pipes EN 10210, quality S355J2H

Range of sizes

- Outer diameter: 219.1 mm – 610.0 mm
- Wall thickness: 5.6 mm – 25.0 mm

Service

On request, we will saw cut lengths using our high-performance band-saws. We also offer you shot-blasting in accordance with the SA 2.5 standard and temporary corrosion protection in a variety of colours and coating thicknesses. We work with reliable partners in order to execute the following modifications: 3D tube laser cutting, chamfering, bending and drilling.
