Materials and technical delivery specifications

- | | | |
|--------------------------|----------------------------|--------------|
| ■ Structural steel | Material S355J2H/S355J2H+N | EN 10210-1+2 |
| ■ Mechanical engineering | Material E355+AR/E355+N | EN 10297-1 |
| ■ Pressure purposes | Material P355N | EN 10216-3 |

Services

On request, we will saw cut lengths using our high-performance bandsaws. We also offer you shot-blasting in accordance with the SA 2.5 standard and temporary corrosion protection in a variety of colours and coating thicknesses. We work with reliable partners in order to execute the following modifications: 3D tube laser cutting, chamfering, bending and drilling.
